

<10%

of all buildings are Smart Buildings but 90% of buildings are ready for a retrofit solution

Create smart buildings with a wireless sensor mesh

Syncromesh®

Cognian's Syncromesh components help you quickly and easily convert existing or new buildings into human-centric smart spaces with minimum build-out cost and no disruptions to tenants. Our Bluetooth device mesh requires only power and utilizes Azure Sphere to create a secure and scalable IoT connectivity platform for any smart building use case solution.

Time to value

Get data to the cloud quickly and easily, from hundreds of different BLE sensor types, to create your custom smart building solution

Built-in savings

Deploy sensors and upgrade your building using line power or batteries without construction or disruptions to occupants

Scalable platform

Start with as little a single use case and later scale out to multiple use cases simply by adding more BLE sensors to the platform
